The cost of working in London has made it **cheaper** - and **better** - to commute from Europe

London removals and relocation firm Kiwi Movers have created a European Commutability Index to help London workers find a city to commute from that doesn't cost the earth to live in. Here they've highlighted the 12 best commutable cities in Europe.

Taking into account a range of lifestyle factors, such as commute time, commute cost, rent, cost per square foot and local climate, they've come up with 'commutable 12' - Europe's best cities for working in London.
